

McKesson Pharmacy Systems PharmacyRx

Process prescriptions swiftly and easily with a cost-effective pharmacy management system

- ✓ **Installs quickly & easily**
- ✓ **Backs up & protects all of your data**
- ✓ **Increases profits without heavy IT investment**

PharmacyRx is the ideal choice for processing prescriptions quickly & easily.

PharmacyRx, a centrally hosted system is not only the ideal choice for new pharmacies that want to start processing prescriptions quickly, it does it with limited hardware requirements and a low cost of ownership. The full feature processing system installs quickly and supports operations with minimal pharmacy staff.

Choosing PharmacyRx gives you access to advanced features such as prescriber lookup, accounts receivable, long-term care and a flexible queue management system. You'll also have the power to make informed business decisions based on information gathered into your easy-to-read executive dashboard and can export data on claims, patients, prescribers and products with nearly unlimited custom reporting features.

Optional business-enhancing modules are also available, including:

- Interactive Voice Response (IVR)
- eSig CapturePlus
- Automation and POS interfaces to easily integrate with other services
- Adherence Performance Solution (APS), an online dashboard that shows you the medication adherence performance of your pharmacy(s), patients, and health plans, based on a calculation similar to CMS Star Ratings.

With PharmacyRx you can connect to all your pharmacy data via the internet, from virtually anywhere at anytime. Having McKesson's data center host your system means there's no need to worry about IT maintenance, upgrades and backups. Plus, PharmacyRx removes the need for expensive and complex server equipment at each of your stores, and each pharmacy workstation can run on PCs that meet simple minimum configuration standards.

Improve Efficiency

- Enable rapid filling of prescriptions with minimal keystrokes with Fast Fill, PreFill, and ePrescribing.
- Increase inventory turnover and reduce losses associated with out-of-date shelf items with advanced inventory management capabilities.
- Streamline your pharmacy processes with optional workflow functionality.

Boost Profitability

- Minimize upfront and ongoing hardware investments with modest hardware requirements.
- Improve operations with flexible, easy-to-maintain price schedules, clinical inquiry, prescriber fax and HIPAA acknowledgment tracking.

Maintain Patient Safety

- Safety checks include Audit Scan, Rx hard-copy image capture, product images/imprints, verification, and quality control reports.
- Color-coded DUR information such as drug allergies and drug-to-drug interactions easily draw attention for review and appropriate sign-off based on user defined priority and permissions.
- Help patients benefit from reliable and consistent care with early and late refill compliance, detailed consultation tracking and unlimited patient notes.

Manage Your Business

- Make informed business decisions by referencing the executive dashboard, which gathers information into one easy-to-read overview.
- Export data on claims, patients, prescribers and products for virtually unlimited custom reporting

“It's nice to know that when I log off at the end of the day I can assume everything is done for me - backing up the information, keeping the information safe. Whatever I need to be done, PharmacyRx does it for me.”

—Tom Bertolino,
Owner, Bertolino's Pharmacy
